Barenbrug USA partners with Golf Enviro Systems, Inc. to distribute turf seed in Colorado.

March 1, 2005 Tangent, Oregon. Vice-President of National Sales, John P. Walther, announced today that Golf Enviro Systems, Inc. (GES) has been chosen to be a Barenbrug USA Advantage distributor in the state of Colorado. “Beginning with Golf Enviro Systems first shipment of turf seed this spring, GES will be charged with expanding the golf market in the Colorado area,” said Jill Taber, Territory Manager for Barenbrug USA.

GES will carry the complete Advantage line, which includes not only Turf Star, Turf Blue, Panterra, & Panama but also the new Turf Saver with RTF. Barenbrug and GES have also partnered up to create two specialty mixes specifically for GES exclusive customers. “This is a great fit,” Walther said. “With Golf Enviro Systems extensive knowledge of the Colorado turf market and our superior turf seed, I see great opportunities for both our entities to expand market share and grow together.”
