Forage Feast

High Quality Chicory

- Bolts later than Puna
- Perfect pasture supplement
- Deep rooted and very drought tolerant
- Highly palatable and nutritious
- Great source of protein and energy
- Anti-parasitic properties, enhancing animal health
- Great for extending grazing into summer

Forage Feast chicory is a high quality, reduced bolting chicory. Reduced bolting equates to higher feed value. Leafiness of Forage Feast is impressive. It is an excellent source of digestible energy, protein and minerals. In addition, chicory has been shown to have key anti-parasitic properties in small ruminants. Forage Feast has proven itself in livestock and wildlife programs. Its deep taproot lends persistence and production in extreme heat and moisture stress. It also exhibits winter-hardiness. Forage Feast is ideal as a component in a mixture with cool-season grasses and legumes.
